Rain fell with but little intermission, from a very early hour yesterday morning until late in the afternoon. Our streets and levee are covered with mud. Business was almost suspended and bur local packets got away with poor trips.

BERKEAL BESINESS.

W. H. WOOB, - Vice-President.

There was nothing of general interest transpiring in the general markets to-day. Trade, as a general thing, is remarkably dull in every department, the demand being restricted to the immediate wants of buyers. Merchants are making but little effort to press sales. Cash, or as near cash as possible, is now the basis of every transaction, and the mercantile and financial affairs of the post ten years, continues to transact a city are being managed with healthy. Rain fell with but little intermission, from a very early hour yesterday morn-ing until late in the afternoon. Our The Ohio was at a stand at Louisville caution.

COTTON—There was a very fair inquiry to-day for all grades and liberal sales. The amount of cotton on hand has been very generally overestimated, and when it was found by actual count that the stock was less than supposed, buyers were more anxious to fill their orders even at better figures. Receipts for the day, 37 baies; shipments, 600 baies. Receipts for the week 1108 bales. on the 24th, and was no doubt, falling vesterday if the rains did not again cause a swell. The steamer Floneer was purchased by Capt. E. J. Brinker at New Orleans a few days ago, especially for the Camden and Arasidelphia trade, for \$8900.

the Americans seem in some way to have gained a special advantage. The suppose court and consular Garette says that amprican loats should be exclusively employed for the traine of the Canton river is a contingency which can be readily comprehended, but we cannot appreciate the move of the employment of British jurisdiction and British capital to the exclusion of British interests.

Moreover, we are very sure that side wheel boats cannot compete with screw boats in the carriage of heavy merchandise, simply on the point of immersion. As the traine on the Yangtze consists of heavy merchandise, if follows that sarey boats are better adapted to the traine than the large American sidewheel boats which now monopolize it. Further, as seraw boats can be built in he gland at about haif the dost that sidewheel boats can be built in the United States, there is no reason why things should not find their proper level, and British interest; be properly represented.

The loyal subject of her majesty who penned the above article had evidently never graveled. Wouldn't 'is eyes hopen to see a few unalted wheel to see a few unalted wheel to see a few unalted wheel to see and loike stufe on a Mississippi paince like the Lee, Richmond or Republic.
